

MAGNER VC-525

Perfecting the art and science of bank note counting.

The Magner VC-525 High Speed Desk-Top Bank Note Counter, the world's smallest vacuum counter providing speed, simplicity, reliability and a high level of accuracy.

HIGH SPEED COUNTING

Precision vacuum system capable of counting 1500 notes per minute. The auto start programmable checking function enables ease of operation.

CONTROL PANEL

A high quality touch key and display panel, ergonomically positioned at 45° in front of the operator. Mode keys light up to indicate the counting mode. Bright 4 digit LED display.

BATCH MEMORIES

6 user programmable memories, the operators can program.

MULTI COUNTING MODES

Counting Mode – Notes in feedplate are counted.

Add Mode – Several counts can be totaled and displayed.

Batch Mode – Count and stop at preset number.

Checking Mode – If the count does not match the check quantity, the feedplate locks to alert a discrepancy.

Alarm Checking Mode – If the count does not match the check quantity, the feedplate locks and alarm sounds to alert the operator of a discrepancy.

EASE OF OPERATION

Automatically goes into Checking Mode upon power on. Check count number can be set from 1 to 199. Start/Reset button built into top of note holding plate. Adjustable, Rotatable 360 customer display for visual confirmation.

MACHINE DIAGNOSTIC TEST

1. Vacuum test
2. Feedplate test
3. Counting head test
4. Stop level test
5. Display test
6. Operation test

DUST EXTRACTION SYSTEM

Continuous dust extraction system minimizes dust during counting operation.

SPECIFICATIONS

Feed System:	Vacuum
