

MAG II Coin Packagers

The least expensive way to get from

before...

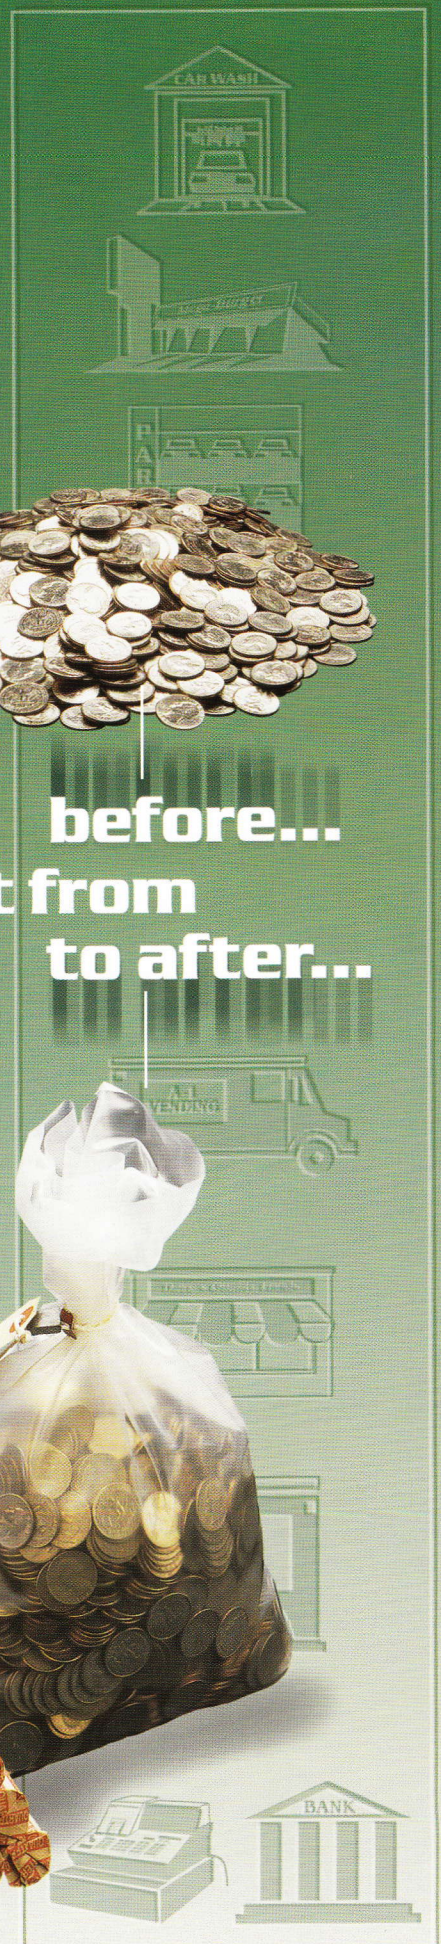

to after...

If your "Before" involves large amounts of presorted coin or moderate amounts of mixed coin, the MAG II 915 Coin Counter/Packager is the low cost, no hassle alternative to manual or older mechanical processing methods.

The Model 915 can count and separate coins at 1,800 per minute with precise accuracy and produce wrapped or bagged coin as a by-product. If space is limited, its compact design will fit your need. If you require portability, no problem. It's lightweight and has a built-in carrying handle.

Now coin processing from "Before" to "After" can be a productive, profitable, and quick experience with the MAG II Model 915 Coin Counter/Packager.
